## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 9-17 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent no. 6,168,106 to Cockerham.

Cockerham discloses a braking apparatus for a fishing reel comprising: a braking assembly; a contacting structure 102 surrounding the braking assembly; a plurality of braking elements 96 slidably located within the braking assembly, the braking elements 96 slidably movable from a retracted position to an extended position, wherein the braking elements 96 make braking contact with the contacting structure 102 in the extended position; and a selector 48 adapted to restrict selected braking elements from the contacting structure.

With respect to claim 2, the braking elements 96 are extended to contact the contacting structure by centrifugal force:

With respect to claim 3, each of the braking elements have a post 110 extending from a surface of the braking elements.

With respect to claim 4, the contacting structure 102 is axially stationary with respect to the braking assembly.

With respect to claims 9 and 10, the braking assembly is comprised of the selector 48 and a brake assembly base; and the selector 48 is rotationally affixed to the brake assembly base.

Claims 1, 3 and 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 6,003,798 to Kim.

With respect to claims 11-17, the method described in these claims would inherently result from the use of the centrifugal brake of Cockerham as advanced above.
